EPA Region 9

Dear EPA Region 9:

Thanks to your hard work, we now have a thorough review and analysis of Rosemont Copper's potential impacts to the environment, along with a mitigation plan to address all of these effects on the surrounding area. No stone, snail or plant has been left unturned or unstudied and the facts clearly show that Rosemont can operate a mine with little to no impact on the environment.

It's now time to move forward and allow Rosemont Copper to complete the permitting process, so that Arizona families can finally start to benefit from the thousands of family-wage jobs and the billions of dollars in economic opportunity that Rosemont will create.

I urge you to not play politics with the economic prosperity of Arizona's families. Please work in good faith and expeditiously to see that Rosemont's Record of Decision is released without delay.

Sincerely,

Ed campbell
